## EXPERIENCE

### WorkFusion, Warsaw – Technical writer

April 2019 – Present

- Created and managed documentation for customers, developers, and DevOps.
- Successfully embedded the “Docs as Code” approach in the development workflow. Implemented Static Site Generators, Git, Markdown, and CI/CD (Jenkins) for writing and publishing documentation.
- Pioneered the UX Writing process within the company. Created and reviewed microcopy. Developed UI style guide.
- Successfully worked with Development, Product, and Delivery teams.
- Assisted developers with the documentation-related workflow and set up the contribution processes.

### Team lead

June 2020 – Present

- Managed and prioritized Documentation backlog.
- Supervised a team of three technical writers.
- Planned the team's activity and capacity, created roadmaps, and managed the Scrum workflow.

### Wargaming, Minsk – Technical writer

June 2015 – April 2019

- Created, reviewed, published, and updated internal technical documentation for developers and DevOps engineers.
- Successfully embedded the “docs-as-code” approach into internal projects and migrated docs from MS Word and Confluence to the web format.
- Created video tutorials.
- Contributed to internal style guides.
- Created design for documentation projects.
